Thank you for the opportunity to provide information for your readers regarding the upcoming election.

1. 73

2. I live in Berkshire Lakes at the intersection of Radio and Santa Barbara.

3. I have lived in Collier County for almost 24 years and lived in 14 major cities along with a few minor ones along the way.

4. Initially my interests were maritime and industrial design. However, I quickly veered into broadcasting…both TV and radio as well as commercial production.

5. You can read more about me on Facebook at: Elect Bruce Buchanan or on the Collier County election website under "candidates".

6. As a Naples Airport Volunteer since 2015, I have completed approximately 75 tours of our airport facilities…including the Control District operations. While a few of these tours were for local civic organizations, most were for Naples youth. It gives me a chance to give back the knowledge and importance of health considerations surrounding the Collier Mosquito Control District.

7. Three things to accomplish if elected:

   A. Ensure the District is and remains the flagship of districts in the state, from a fiscal, operational, and environmental standpoint.

   B. Population of Collier County is growing and moving east. The area of treatment has not been modified since 2007. I feel that dialogue needs to take place at the District level and determine if it's time to make recommendations to the state on expansion of the district

   C. Continue the superior community outreach programs.

8. I have been following the District work and decision making process for years and I am not in disagreement with any of the decisions made, They are the result of research, evaluation, and collaboration.

9. Being an airport tour guide, I get to share all the wonderful assets we have like Collier Medflight, new state of the art fire station, and Collier Sheriff Flight facilities. As a member of the Experimental Aircraft Association Chapter 1067 we offer introductory flights to approximately 150 kids a year. I'm also a mentor for the

Naples Youth Aviation Program 501(c)(3) were local youth get to build a real plane, and mentor for the EAA pilot scholarship program. I consider it a privilege to serve Collier County residents in another capacity, especially when it directly affects so much of our community.
